

Workforce Commitment

Auctus Workforce Solutions is committed to creating an environment that encourages development for all of its workforce. We endeavour to attract and retain the best possible mix and highest calibre of staff and provide them with an enjoyable, stimulating and appropriately challenging environment.

We are committed to ensuring that opportunities are available to all staff to learn and develop within their current role and in preparation for their future career development. This allows our workforce to fulfil their job role more effectively and supports progression. We encourage staff to self-reflect and identify their own development requirements and aspirations, as well as being supported in this process by management.

We recognise that staff development in its broadest sense includes on the job learning, specific training in order to carry out the role, new projects and challenges, knowledge sharing with colleagues, mentoring, training, and study, as well as participation in courses and gaining professional qualifications.

In order for us to be ambassadors for the industry, we have to ensure that we are responsible and provide a safe and professional workplace for our workers. Therefore, to ensure that we deliver the right service to our staff we will always follow these simple rules:

- Commitment to having safety at the heart of everything we do
- Develop your safety awareness and competence
- Pay you on time
- Resolve any queries quickly
- Encourage your career development
